

STEM Classes

We will be offering the following STEM classes for K-8:

K-2 Snap Circuits

Introduction to the basics of electricity and how it flows. They will have hand-on experience building circuits and seeing the output by activating lights, etc.

Grades 3-5

Introduction to web development by planning and building websites using HTML, CSS and JavaScript.

Grade 6-8

Robotics using Vex Robotics kits to build robots and programming them using Python language.

Cost: \$65 per student per session (4 weeks): March 7, March 14, March 21, March 28

Please return all registrations with payment by March 1.

Student name	Grade	Parent Name/ Email

Total payment enclosed: _____
