

## **Summer Learning Packet**

for students entering 3<sup>rd</sup> Grade

Dear Families,

This summer learning packet contains activities to help your student practice their math and reading skills. To spread the work out throughout the summer, your student could choose two activities to complete each week; however, you are welcome to complete the activities at a pace that works with your summer plans. The completed packet should be turned in to Mrs. Ramos during the first week of school.

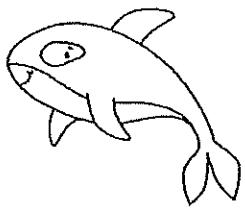

In addition to completing the activities in the packet, I recommend daily reading during the summer to maintain literacy skills. Your local library is a great place to find books that are interesting and enjoyable for your child. The Sno-Isle Libraries and the Everett Public Library have summer reading logs, which students can complete to earn prizes. Students can also choose to complete Ms. Watters' summer *Read-Oh* for a prize when they return to school in the fall.

I'm looking forward to meeting all of the new third graders and their families in the fall – but first, I hope you have a fun and relaxing summer break!

Sincerely,

**Mrs. Ramos**

## Ask and Answer

Whales are amazing creatures. They are mammals that have adapted to live their lives entirely in the ocean. There are many different kinds of whales and they range in size from about 8 to 110 feet. Whales can swim for long periods of time underwater, but they must come to the surface regularly to breathe. They breathe through their blowholes. Whales are warm-blooded and have a layer of fat, or blubber, beneath their skin to keep them warm. Some whales have teeth and others have baleen. Baleen is similar to bristles and filters out food for the whale. Whales have no natural predators, so they can live for long periods of time in the right conditions. Whales certainly are some of the most interesting creatures!

## Character's Reaction

On Saturday morning my mom woke me up so early that it was still dark outside. I was so tired and grumpy. I said, "Mom, let me sleep some more!" But, she said I had to grab my suitcase and get in the car. I was so confused. I had no idea where we were going. Still, I got in the car with my family. We drove and drove. I was so bored and I thought this mysterious car ride would never be over. Finally, the car started to slow down. My mom told me to look out the window. We were at Disneyland! I couldn't believe my mom surprised me with such a fun trip! I was the happiest kid in the world!

How does the author react when...

his mom wakes him up?

---

---

his mom tells him to get his suitcase?

---

---

the car ride is long?

---

---

he arrives at Disneyland?

---

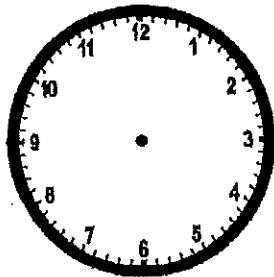

---

Describe how the author of this passage reacts in each situation.
